### CNA Award for Innovation for Railway Data Center menRDC

Last Friday MEN Mikro Elektronik received the CNA award for innovation for the development of a new computer platform for trains that meets the increased requirements for modularity and connectivity in the railway market.

At the innovation awards ceremony Norbert Schäfer, Executive Chairman CNA e.V., complimented the high economic and ecological potential of the innovative concept, which offers flexible usage.

Christian Vogel, second mayor of Nuremberg, emphasized the importance of cost-conscious and energy-reducing measures to increase the attractiveness of the passenger rail transport, and ensure further competitiveness.

Manfred Schmitz and Bernd Härtlein, managing directors at MEN, proudly accepted the award and perceive menRDC, together with the safety-critical system family menTCS, as another milestone on the way to becoming the first-choice supplier for reliable embedded computers in the railway market.
